Introducing **The Bromic Stratos Series** room heater

The modern clean design of the Bromic Stratos range delivers style with optimum performance. It is sleek, compact and quiet and designed to compliment a wide range of indoor decor. The slim line design has the flexibility of wall or floor mounting. The Stratos room heater delivers efficient uniform heating emitted from the base of the unit, resulting in a greater level of comfort for your indoor space. The Bromic Stratos Brahma heaters can be used with Natural Gas or LPG.

Features & Benefits:

- › High efficiency heating
- › Uniform heat for greater comfort
- › Italian Made quality
- › Modern European design
- › 2 Year labour & parts Warranty
- › 4 sizes to choose from

STRATOS 7.0 PICTURED

Bromic Stratos Series

Energy efficient room heaters with greater comfort levels

Designed to complement a wide range of decors, the modern European styling of the Stratos room heaters is visually appealing and provides high efficiency heating and a comfortable uniform heat.

Features & Benefits

■ High efficiency heating

- + Air flow from base of system for uniform heat
- + Up to 4.6 efficiency star rating

■ Zero indoor emissions

- + Room sealed design for zero emissions
- + Optimal indoor air quality through power flue operation

■ Quality European design & versatility

- + Slim line, modern style finish
- + Wall or floor mountable
- + Intuitive digital touch button control panel
- + Italian made

■ Humidifier tray

- + Increases humidity to the air
- + Easy to clean, removable tray

■ 2 year full parts & labour warranty

- + A product you can trust

■ Optional Accessories Available

- + Wireless climate controller
- + Wireless remote

Control Panel

Humidifier Tray

Wireless Climate Controller (Accessory)

Comfort all year round, even in summer

The **Bromic Stratos wireless remote (Accessory)** features a summer ventilation function, which allows the heater to be set to run the fan only (no gas consumption). This delivers an even greater level of comfort during the warmer months. The wireless remote is designed to be either wall mounted or placed on its own stand. It has an in built thermostat that delivers greater comfort by sensing temperature within the room at human height, and maintaining the room temperature to 1° Celsius.

Wireless Remote (Accessory)

- + Temperature setting by wireless remote between 5°-35°C
- + 9 preset programs (factory set)
- + 4 personalised programs
- + Push button lock function
- + Summer ventilation function (fan only)

Flued Heaters Installation Guidelines

- + All Bromic room sealed heaters must be installed by a licensed plumber/gas fitter
- + Please ensure that Bromic fluing is used on each installation. If not, warranty will be void and performance compromised
- + Room sizing is only dependant on the heat load required
- + Requirements in some States require that a certificate of compliance is given to the consumer new and/or replacement installations
- + Australian Standard AS5601 are to be complied with all installations of Flued gas heaters

Bromic Supaheat™ II Series

Compact, powerful highly efficient heating solution

The Bromic flueless Supaheat™ II indoor gas heater is specifically designed to heat up a room, instantly and efficiently.

Features and benefits

■ Easy Ignition

The one-touch electronic igniter system means no matches or any other electric sources are needed to light the heater. The ignition system requires a "C" size 1.5V batter to operate

■ Flame Failure Safety Device

If the flame is extinguished for any reason, the gas supply will shut off automatically

■ 2 Step Heat Control

The 2 step heat control allows you to easily adjust the heat to the right temperature. Choose from 1 heating tile glowing (minimum heat setting) to 2 heating tiles glowing (maximum heat setting)

■ Safety Tilt Switch

If the unit is tilted or knocked over, the heater turns off automatically

■ Oxygen Depletion Sensor Safety Device (ODS)

The ODS pilot shuts off the heater if the normal air oxygen content in the room is reduced below a safe level

Includes 1500mm easy-grip bayonet hose

High and low heat setting

Top vent for natural convection heating

What size Bromic indoor heater is right for me?

Selecting the right heater is important for the comfort of your space. There are many options to consider to ensure the heater selected will provide the right level of heat, and therefore comfort, for your room.

The Bromic Supaheat™ II Series heaters are available in one standard size, for either Natural Gas or LPG.

The Bromic Stratos Series power flued gas room heaters are available in a range of sizes up to 7.2kW. As a general guide when estimating for indoor heater sizing: 1kW output heats up to 10m².

However there are a number of items to consider when selecting an appropriate heater.

For example:

- › Is the room insulated?
- › How high is the roof?
- › Will the room be closed off by doors or have adjacent rooms or hallways leading off it?
- › Are there curtains on the windows?
- › Is it a brick veneer home?
- › Is the room carpeted?
